

# Work Session Day 2

## Day 2 Elements that Contribute to Success

The Tribal Council were asked to complete a self-assessment rating each element according to where they thought they are today in each of the Elements that Contribute to Success. The elements were rated on a scale of 1-5, with one being the lowest rating and five being the highest. The graph below shows the average ratings among all Council for the second day. A noticeable difference from the first day where all components moved to average (3) or above average for each of the elements listed. This was a great accomplishment and not something often seen as such a large improvement from one day to the next in years of experience in giving this assessment to other Tribes.

Elements that contribute to Success
